“One of the best things about studying the MPA–MBA at JCU was the opportunity to attend university in the Tropics. It was a fantastic place to live and work. The small class sizes and excellent teaching staff made a big difference, too. JCU accepted my work experience and previous university studies for advanced standing, which meant I could complete my degree faster. The list of potential job opportunities are almost endless if you have both an MBA and MPA.”

Gary Myers

MASTER OF PROFESSIONAL ACCOUNTING–MASTER OF BUSINESS ADMINISTRATION GRADUATE

“One of the best feelings as an academic is to see your former students succeed in our chosen field. The great thing about accounting is that the vast majority of students have gained employment by the last year of their degree; in this case, the competition is between accounting firms for our students, not the other way around! Many of our previous students rise to senior ranks, or travel to overseas postings after they complete their professional accreditation, a testament to them and to the strength of our accounting program.”

Dr Mohammad Azim
